ACKNOWLEDGMENT

This oral history is part of a series supported by grants from the Gordon and Betty Moore Foundation. This series is an important resource for the history of semiconductor electronics, documenting the life and career of Gordon E. Moore, including his experiences and those of others in Shockley Semiconductor, Fairchild Semiconductor, Intel, as well as contexts beyond the semiconductor industry.

This oral history is made possible through the generosity of
the Gordon and Betty Moore Foundation.
CHEMICAL HERITAGE FOUNDATION
Oral History Program
FINAL RELEASE FORM

This document contains my understanding and agreement with Chemical Heritage Foundation with respect to my participation in an audio recorded interview conducted by
__________ David Brock and Christophe Lecuyer ______ on __________ 11/17/2005 and 12/16/2005

I have read the transcript supplied by Chemical Heritage Foundation.

1. The audio recording, corrected transcript, photographs, and memorabilia (collectively called the “Work”) will be maintained by Chemical Heritage Foundation and made available in accordance with general policies for research and other scholarly purposes.

2. I hereby grant, assign, and transfer to Chemical Heritage Foundation all right, title, and interest in the Work, including the literary rights and the copyright, except that I shall retain the right to copy, use, and publish the Work in part or in full until my death.

3. The manuscript may be read and the audio recording(s) heard by scholars approved by Chemical Heritage Foundation subject to the restrictions listed below. The scholar pledges not to quote from, cite, or reproduce by any means this material except with the written permission of Chemical Heritage Foundation.

4. I wish to place the conditions that I have checked below upon the use of this interview. I understand that Chemical Heritage Foundation will enforce my wishes until the time of my death, when any restrictions will be removed.

Please check one:

a. _______ No restrictions for access.

   NOTE: Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to obtain permission from Chemical Heritage Foundation, Philadelphia, Pennsylvania.

b. _______ Semi-restricted access. (May view the Work. My permission required to quote, cite, or reproduce.)

c. _______ Restricted access. (My permission required to view the Work, quote, cite, or reproduce.)

This constitutes my entire and complete understanding.

(Signature) ________ Robert Robson ________

(Date) ___________________ Revised 10/11/05
This interview has been designated as **Free Access**.

One may view, quote from, cite, or reproduce the oral history with the permission of CHF.

**Please note:** Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to credit CHF using the format below:

The Chemical Heritage Foundation (CHF) serves the community of the chemical and molecular sciences, and the wider public, by treasuring the past, educating the present, and inspiring the future. CHF maintains a world-class collection of materials that document the history and heritage of the chemical and molecular sciences, technologies, and industries; encourages research in CHF collections; and carries out a program of outreach and interpretation in order to advance an understanding of the role of the chemical and molecular sciences, technologies, and industries in shaping society.
ROBERT ROBSON

1935 Born in Bowman, North Dakota on 11 May

Education

1955 B.S., Industrial Engineering, South Dakota State University
1959 Industrial Engineering, San Jose State, California

Professional Experience

Farnsworth Electronics Incorporated
1957-1958
Foreman

Fairchild Semiconductor Corporation
1958-1962
Production Superintendent

Amelco Corporations (Teledyne)
1962-1968
Manufacturing Manager

Intersil Corporation
1968-1970
Vice President of Manufacturing

Microma Corporation
1970-1972
Chairman and President
Robert Robson begins the interview with a discussion about growing up in South Dakota. He discusses his education, his involvement with the Army, and his early interest in electronics. He also details his move to California and his involvement with the electronics industry. He describes his employment at Farnsworth Electronics Incorporated and Fairchild Semiconductor Corporation. He describes his interaction with Robert Noyce, Gordon Moore, Andrew Grove, and several other prominent industry leaders. At Fairchild, Robson became production superintendent of the Special Products Group. He left Fairchild after working there for four years. Robson continues the interview by describing his relationship with the semiconductor industry, along with his employment at Amelco, Teledyne, Intersil, and Microma. Robson was manufacturing manager at Amelco, and went on to found Microma, where they worked on the digital watch at its beginning. After two years, Robson sold Microma to Intel and bought a thousand-acre ranch where he and his wife, Sharleen, farm nuts. Finally, he discusses his friendship with Gordon and Betty Moore, describing fishing and hunting trips they took together.

INTERVIEWERS

David C. Brock is a senior research fellow with the Center for Contemporary History and Policy of the Chemical Heritage Foundation. As an historian of science and technology, he specializes in oral history, the history of instrumentation, and the history of semiconductor science, technology, and industry. Brock has studied the philosophy, sociology, and history of science at Brown University, the University of Edinburgh, and Princeton University (respectively and chronologically). His most recent publication is Understanding Moore’s Law: Four Decades of Innovation (Philadelphia: Chemical Heritage Press), 2006, which he edited and to which he contributed.

Christophe Lécuyer is a graduate of the École Normale Supérieure in Paris, and he received a doctorate in history from Stanford University. He was a fellow of the Dibner Institute for the History of Science and Technology and has taught at the Massachusetts Institute of Technology, Stanford University, and the University of Virginia. Prior to becoming a senior research fellow at CHF, Lécuyer was the program manager of the electronic materials department. He has published widely on the history of electronics, engineering education, and medical and scientific instruments and is the author of Making Silicon Valley: Innovation and the Growth of High Tech, 1930-1970 (2005).
TABLE OF CONTENTS

1  Childhood and Education
   Army. Introduction to electronics.

3  Career
   Moving to California. Farnsworth Electronics Incorporated. Fairchild
   Semiconductor Corporation. Working with Gordon E. Moore, Robert Noyce,
   Andrew Grove, and other prominent industry leaders. Amelco Corporation.
   Intersil. Intel Corporation.

20 Interactions with Gordon and Betty Moore
   Fishing trips. Traveling. Gordon Moore and his family. The Gordon and Betty
   Moore Foundation.

27 Relationship with Semiconductor Industry People and Early Production at Fairchild
   Semiconductor
   Industry leaders and coworkers. Women working and training. Special Productions
   Group. Transistors. Paul Henchliff and the invention of the planar process.
   Beginning of the microcircuit.

41 Competition
   Rheem Semiconductor. Texas Instruments.

44 Leaving Fairchild Semiconductor
   Amelco. Manufacturing Manager. Teledyne. Interacting with industry leaders.

54 Intersil
   Vice President of Manufacturing. Gene Troyer. Bipolar. CMOS. Leaving and
   forming Microma.

57 Microma
   CMOS driver. Bipolar process for making timing circuits. Founder and president of
   Microma. Selling to Intel.

62 Leaving the Electronics Industry
